

# AMERICAN BRIDGE CAPITAL

## DOING BUSINESS AFTER A DISASTER

### About Us

American Bridge Capital (**ABC**) provides specialized bridge financing secured by federal, state, and local government receivables where the ultimate payor is a federal agency or program. We advance up to 80% of eligible invoices and receivables while borrowers wait for reimbursement or funding disbursement – typically 3-18 months ahead of federal payment.

### ABC CAPBILITIES

ABC has deep expertise and works with eligible federal disaster grant recipients, as well as their contractors, who require our assistance in financing their claims for both post-disaster response and recovery projects and pre-disaster mitigation projects.

#### Typical Clients

- ★ State/Local Governments
- ★ Nonprofits
- ★ Contractors (Primes and Subs)

In the United States, state and local governments bear primary responsibility for mitigating against, preparing for, responding to, and recovering from disasters. The Federal Government's primary role is to provide critical funding in the form of grants. In the event of a large disaster, the Federal Government funds most, if not all, response and recovery costs.

While processes for accessing these funds are clear and predictable, grant recipients and their contractors often wait several months before obtaining the necessary funding to pay contractors and commence permanent recovery projects. ABC provides critical financing to bridge this gap.

### NEXT STEPS

ABC is actively originating transactions across all federal reimbursable programs, contracts, and funding initiatives. For a confidential discussion, please provide: federal program and award documentation, scope and timeline of eligible expenses, current funding structure and liquidity needs, and anticipated federal reimbursement schedule.

### Federal Disaster Programs & Agencies

- ★ FEMA Public Assistance Program (PA)
- ★ FEMA Hazard Mitigation Grant Program (HMGP)
- ★ HUD Community Development Block Grant–Disaster Recovery (CDBG-DR)

### What We Do

ABC works with federal disaster reimbursement recipients and contractors to get the funding they need to perform critical recovery work. Simply put, we help organizations and communities rebuild faster and stronger after a disaster by getting them the funding they need while navigating the federal disaster reimbursement process.
